AGRICULTURAL RESEARCH SERVICE

Dairy-Herd-Improvement-Association Letter ARS-52-25  
(Vol. 32, No. 1)  
January 1956

636,293 LACTATION RECORDS REPORTED DURING 1955

During 1955, 636,293 lactation records were reported to the Dairy Husbandry Research Branch for use in proving DHIA sires. DHIA supervisors reported 570,220 of these records; 66,073 were Herd Test records reported by the various breed associations. The number of Herd Test records reported by the various associations is as follows:

	Herd Test records reported (number)
American Dairy Cattle Club-----	1,518
Ayrshire Breeders' Association-----	12,836
Brown Swiss Cattle Breeders Association---	5,424
American Guernsey Cattle Club-----	21,770
American Jersey Cattle Club-----	24,525

The number of lactation records reported each year, since 1946, is shown below:

Year	Lactation records reported (number)
1946 -----	183,884
1947 -----	250,811
1948 -----	285,083
1949 -----	391,067
1950 -----	471,721
1951 -----	540,953
1952 -----	485,949
1953 -----	501,582
1954 -----	667,074
1955 -----	636,293

The 636,293 records reported during 1955 represent approximately 48 percent of the 1,333,866 cows on test at the beginning of the year.

## 5, 986 DHIA SIRES PROVED IN 1955

During 1955, proved-sire records were compiled for 5, 986 sires used in dairy-herd-improvement-association herds. This is the largest number of sires proved in any year since the Nation-wide-sire-proving program was inaugurated in 1935. During this period 51, 886 DHIA sires have been proved.

The number of sires proved in 1955 by States is as follows:

State	Sires proved (number) <u>1/</u>	State	Sires proved (number) <u>1/</u>
Alabama-----	26	Nebraska-----	93
Arizona-----	16	New Hampshire-----	96
Arkansas-----	11	New Jersey-----	166
California-----	66	New Mexico-----	30
Colorado-----	45	New York-----	1, 258
Connecticut-----	239	North Carolina-----	123
Delaware-----	36	North Dakota-----	28
Florida-----	35	Ohio-----	306
Georgia-----	39	Oklahoma-----	39
Idaho-----	133	Oregon-----	128
Illinois-----	376	Pennsylvania-----	794
Indiana-----	234	Rhode Island-----	36
Iowa-----	387	South Carolina-----	40
Kansas-----	196	South Dakota-----	13
Kentucky-----	74	Tennessee-----	51
Louisiana-----	25	Texas-----	67
Maine-----	116	Utah-----	60
Maryland-----	316	Vermont-----	212
Massachusetts---	198	Virginia-----	202
Michigan-----	306	Washington-----	169
Minnesota-----	316	West Virginia-----	81
Mississippi-----	15	Wisconsin-----	738
Missouri-----	123	Wyoming-----	13
Montana-----	13	Total-----	<u>2/</u> 5, 986

1/ Number includes 1 or more sires proved with data from some other State as well as from the State indicated.

2/ Omitting duplication.

# DHIA PROVED-SIRE RECORDS TABULATED IN DECEMBER 1955

Following is a list of 61 sires whose records were tabulated or retabulated by the Dairy Husbandry Research Branch in December 1955. Production records used in proving DHIA sires consist of 305-day lactation records standardized to a mature equivalent twice-a-day milking basis.

An asterisk at the end of a sire's registration number indicates a retabulated record. The asterisk may be followed by any number from 1 through 15 (i. e., \*12) to indicate in which of the 15 printed lists his previous record appeared. Or the asterisk may be followed by the month and year (i. e., \*May 51) of the DHIA letter in which his previous record appeared. Two asterisks following the sire's registration number, or following reference to a previous listing, indicate that the proved-sire tabulation or retabulation was requested by one of the States.

In case records from more than one herd were used, the reference is to the herd from which production records for the largest number of the sire's youngest daughters were reported. If the sire has been used in an artificial-breeding association, the name of the association is given.

Proved-sire records consisting of fewer than 10 comparisons are indicated as "preliminary proofs" because these records may be significantly changed when additional comparisons become available and are included in the proved-sire records.

Proved-sire records consisting of fewer than 25 comparisons with daughters resulting from artificial breeding are indicated as "preliminary AB proofs" because these records may be significantly changed when additional comparisons become available and are included in the proved-sire record.

To make the most intelligent selection of a sire, the dairyman should use these proved-sire records to single out the most promising sire and then make every effort to supplement these data with additional information gathered from the herds in which the dams and daughters made their records. Particular attention should be given to the feeding practices and environmental conditions under which the records were made, in order to be assured that the records of the daughters were not made under more favorable conditions than those of the dams or vice versa. It is especially important to determine that there has been no selection of daughters in making the comparison.
